EDUCATION

Hanyang University

Undergraduate Student, Department of Data Science

Mar. 2022 – Present

GPA: 4.01 / 4.5

RESEARCH INTERESTS

- Ax Systems
- Agent Architecture
- Ontology

RESEARCH EXPERIENCE

Hanyang University

Hanyang Human-Centered Computing Lab

Sep. 2026 – Present

- Undergraduate Research Assistant

DGIST

Next-Generation Experience and Technology Laboratory

Jan. 2026

- Research Intern

- Worked on Quest 3-based mesh reconstruction.

PROJECTS

Dure: Village-Scale Operations System

Mar. 2026 – Present

Hanyang University, Social Innovation Capstone PBL

- Planned and developed the front end and back end of an operations system for village administrators.

Real-Time Interactive 3D System

Oct. 2025 – Dec. 2025

Graduation Project Assistant, Department of Interior Architecture Design, Hanyang University

- Engineered and implemented an embodied system integrating real-world physical sensor inputs.

Deep-Sea World: Interactive 3D Simulation

Sep. 2025 – Dec. 2025

Personal Project

- Designed and built a large-scale, interactive deep-sea environment from scratch using Unreal Engine.

AWARDS & HONORS

- **Second Place**, 2nd D&B Academic Festival, Hanyang University

Team award for DnB Ontology Validation Harness, an ontology-guided system for checking consistency between fund trust agreements and investment memoranda.

SKILLS

- **Languages:** Python, C++, Java
- **Frameworks:** PyTorch
- **3D Engines:** Unreal Engine 5, Unity
